

Andrés J. Bueno

Frontend Developer

Frontend developer coursing electrical engineering program. I have been a web developer since I was 16 years old. With deep knowledge in JavaScript, HTML, CSS and JavaScript technologies and good understanding of PHP and MySQL.

I have felt passionate about learning since I was a child, found my happiness in acquiring knowledge and helping others to achieve their goals. Self-taught and empathetic by nature.

I trust the dots will be connected in the future.

Work Experience

Web Developer Come Learning (Cartago, Valle)

January 2018 - November 2019

- Developed the web page on PHP which was in charge of collecting students data.
- Developed an MVP which was in charge of connecting struggling students with tutors on different subjects.
- Developed lading page.

Education

Electrical Engineer

Technological University of Pereira (Pereira, Risaralda)

January 2020 - November 2022

- Engineering program focused on the use, distribution and generation of electrical energy in an environment-friendly context, providing solutions to modern problems associated with electricity.

Technical Software Development

SENA (Cartago, Valle del Cauca)

January 2018 - November 2019

- There I learned my basis of development, the program was focused on the whole process, from analysis to deployment and support of web applications.

Certifications

DOM Manipulation

Platzi

October 2022

- This certification is based on the usage of different JavaScript elements to manipulate the DOM, the objective is to understand how different frontend frameworks work internally.

Professional JavaScript

Platzi

October 2022

- Here I learned most of my JS basics, data structures, algorithms, and hit my first steps on TypeScript, the project was a Media Player which you can find on GitHub
